Discover the world of patents

Highlights from an independent evaluation of PatBase

The Product

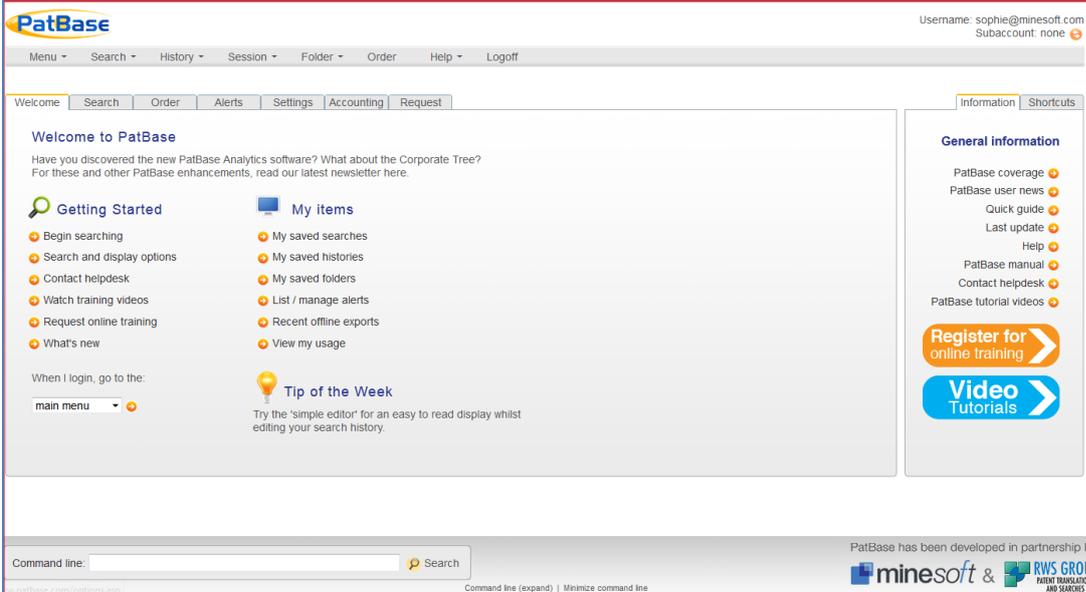

“...a global patent database spanning more than 100 patent-issuing authorities worldwide...”

The Technology

“The interface is tab based with the majority of the information contained within those tabs so as not to overwhelm the user with all of the information on one screen. This is a wise move...”

The PatBase Welcome Screen

A screenshot of the PatBase web application's welcome screen. The interface is clean and organized. At the top, there's a navigation bar with a "PatBase" logo on the left and a user login area on the right showing "Username: sophie@minesoft.com" and "Subaccount: none". Below the navigation bar is a horizontal menu with tabs for "Welcome", "Search", "Order", "Alerts", "Settings", "Accounting", and "Request". The main content area is divided into several sections: a "Welcome to PatBase" message, a "Getting Started" section with a list of links like "Begin searching" and "Search and display options", a "My items" section with links like "My saved searches" and "My saved histories", and a "Tip of the Week" section. On the right side, there's a "General information" sidebar with links for "PatBase coverage", "PatBase user news", "Quick guide", "Last update", "Help", "PatBase manual", "Contact helpdesk", and "PatBase tutorial videos". At the bottom of the sidebar, there are two prominent buttons: "Register for online training" and "Video Tutorials". The footer of the page includes a "Command line" search box, a copyright notice, and logos for "minesoft" and "RWS GROUP".

“...the searching capabilities of this product are robust.”

The Searching

“PatBase has created a powerful form that caters to expert searchers’ needs for casting both wide and narrow nets.”

The PatBase Search Form

The screenshot shows the PatBase search form with various search criteria. A red arrow points to the 'Command line' field at the bottom left. A callout box on the right contains the text: “The Command Line is available on every screen of PatBase which is very convenient.”

Field	Example
Claims, title & abstract	e.g. crane* and motor
Assignee (PA)	e.g. siemens
Inventor (IN)	e.g. Depta Robert
Publication number (PN)	e.g. US4500000
Publication date (PD)	e.g. 19970221
Priority number (PR)	e.g. US19990454001
Priority date (PRD)	e.g. 199702
Application number (AP)	e.g. US20000493582
Application date (APD)	e.g. 1997
Kind Code (KD)	e.g. DEU* or EPB1
Publication country (CC)	e.g. US or EP
Designated states (DS)	e.g. DE or FR
Agent (AG)	e.g. GRIFFITH HACK
Cited patent (CT)	e.g. DE19646559
Int. class (All)	e.g. C12N5/06 or G01 or A
Cooperative Patent (CPC)	e.g. H04W84/12 or H04W84 or H
Classification (EC)	e.g. C08L23/08 or C08 or C
Classification US (UC)	e.g. 123/321
JP class F-Index (JCI)	e.g. G06F9/00/320/A
JP class F-Term (JCT)	e.g. 2H091/FA14/X
JP class Facet (JCF)	e.g. GBV
Locarno class (LC)	e.g. 26/03

Command line: | Search

The Saved Searches and Folders

“A single search statement with its results can be saved to a Folder. The Folder utility provides a lot of flexibility to store, use, share and manipulate previously obtained search results.”

Publish/send results

The screenshot shows the 'Publish/send results' form. It includes a link to view published results, an email form, and two buttons: 'Send email' and 'Send using your local mail client'. A callout box on the right contains the text: “Folders can be ‘published’. A URL-link is generated to the particular folder that can then be emailed to both PatBase subscribers and non-subscribers.”

Click the link below to view your published results:

The Displays

PatBase offers several display choices. Under the “Menu” tab, you can select “Display/search options” and customise your display preferences.

Some Display/Search options

Display options

Default keyword search: Claims, title & abstract Default number of records to display: 10

Default record display format: Custom Define custom display format

Default sorting order: Priority date desc PDF export page size: A4

Search history display order: Descending

Disable floating toolbar Use larger fonts

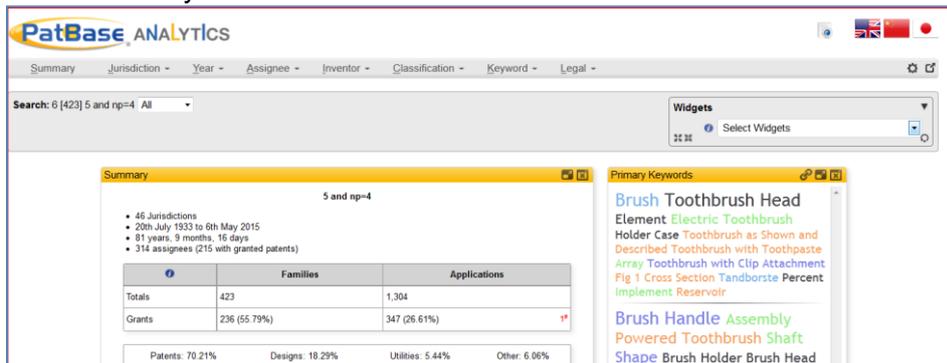

“You can also create and save your own custom display.”

The Alerts

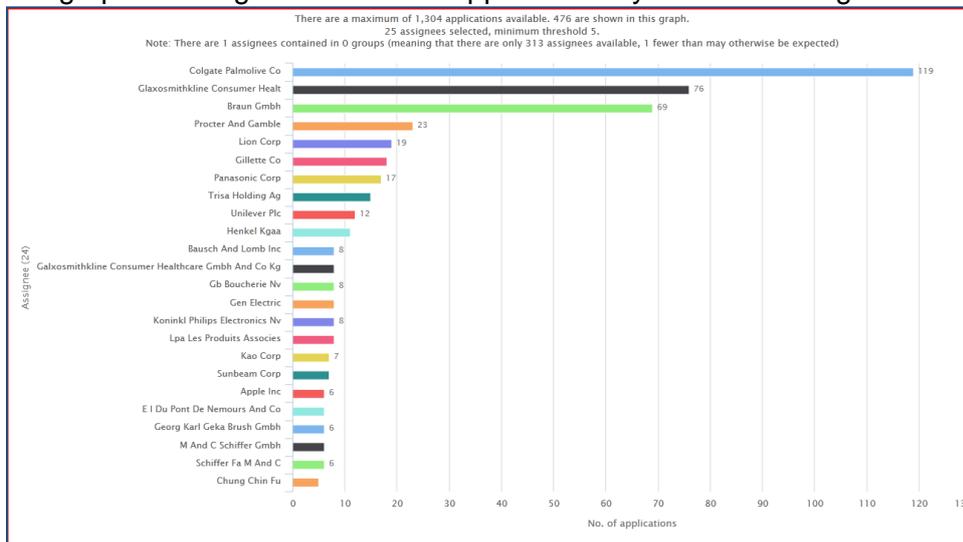

There are some advanced options that are particularly useful. INPADOC legal status changes and first English abstract are especially helpful and provide more relevant results than just a regular date-based update.

PatBase Analytics creates a dashboard of widgets that are customisable. Each individual widget is customisable as well.

PatBase Analytics Welcome Screen

FreePint's View: PATBASE SOURCES

- Extensive country coverage
- Substantial amount of full text
- PDFs available for major issuing bodies

The case for accessing and utilising intellectual property information is an easy one to make. Due diligence for mergers and acquisitions, patent litigation suits, and litigation risk assessments all depend on the ability to gather high quality, reliable IP information.

A graph showing the time lag between application and grant by jurisdiction

Information professionals, business development and R&D staff need to quickly generate the analyses that will help them make better decisions for business-critical activities including licensing opportunities and prior art.

“The ability to share data from PatBase across the organisation to subscribers and non-subscribers at no additional cost is a distinct advantage.”

Time savings equate to cost savings. An intuitive search tool, such as PatBase, that allows for precise and rapid retrieval of extensive and complex intellectual property data can allow go/no go decisions to be made more quickly.

The Product Maturity and Development

Minesoft has been in existence since 1996, and PatBase has been on the market for almost 12 years. The company shows no signs of resting on its laurels, nor does it look to be in danger of an imminent merger or takeover.

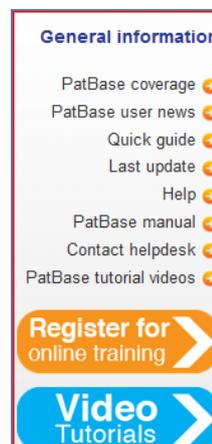

“...a dedicated team working on constant enhancements and improvements to the product”

The User Support and Training

There are numerous online tutorials that can be found via a link under “General Information” on the Welcome page. There is also a 150+ page user manual available as a PDF. You can register for a personal WebEx online tutorial as well.

FreePint’s View: PATBASE TECHNOLOGY

- Web-based platform
- Many different ways to search - should accommodate most users
- Abundance of tips, instructions and examples to assist with searching
- Flexibility with command and form searching
- Extensive export options
- Analytics tools
- Folders allow for significant manipulation, storage and sharing of search results

Taken from the original article “Review of Minesoft PatBase” by Robyn Smith

About Robyn

Robyn Smith has been a librarian for 25 years - primarily in the pharmaceutical and medtech industries. She has experience in searching, copyright, marketing of services, and vendor contract management. Robyn has been an active member of SLA and is a former chair of the Pharmaceutical and Health Technologies Division of SLA. She currently resides in Minnesota.

About Minesoft

Minesoft develops patent, scientific and technology publishing products and services for intellectual property and research specialists. Building global patent information solutions since 1996, Minesoft’s products are used daily by leading corporations, national Patent Offices, IP firms and research specialists around the world.
